

ROVTECH SOLUTIONS PLC

Harsh Environment Problem Solvers

1000m Down Hole Pan/Tilt Camera System

Consists of:

- 316 Stainless Steel
- 1000m Rated
- High Resolution Low Light Camera
- 360 Degree Continuous Pan
- 90 Degree Tilt
- Integral Hi-Brightness White LEDs
- Digital Recording to SD Card
- Additional External LED Option

The RSL Down Hole Camera was developed for the Offshore Industry through Inspection Engineers requesting a solution not readily available on the market. The external collar was specified, however the diameter can be adjusted for any specific operation.

The high resolution camera and integrated LEDs gives crisp, real time, high quality colour images to assist in a wide variety of underwater operations.

The Camera is designed to be both easy to transport when rapid mobilisation is required, easy to set up and above all easy to operate.
