Harsh Environment Problem Solvers

RSL Telescopic Pole Camera

The Rovtech Solutions Lightweight Telescopic Pole Camera has been designed and developed to offer a portable Underwater and In-Air Inspection Camera

The standard pole system extends up to 8m, but this can be increased to 22m if required.

The extendable pole is user friendly, with no tools required for adjustment of length.

The Camera is mounted on a manually adjustable tilt that can be set in any position between 0 - 140 degrees

The system has the following features:

- Seacam Hi-Spec (+600 TVL) Underwater Colour Camera
- Integral White LED Lighting (Variable Intensity)
- Lightweight Telescopic Pole (from 8m - 22m)
- Battery Operated with Internal Rechargeable Battery Pack
- Cable housed within the pole
- Portable Controller with Variable LED Lighting Controller
- 7" Monitor with built in SD Card Recorder
- Optional Video Overlay with Time and Date

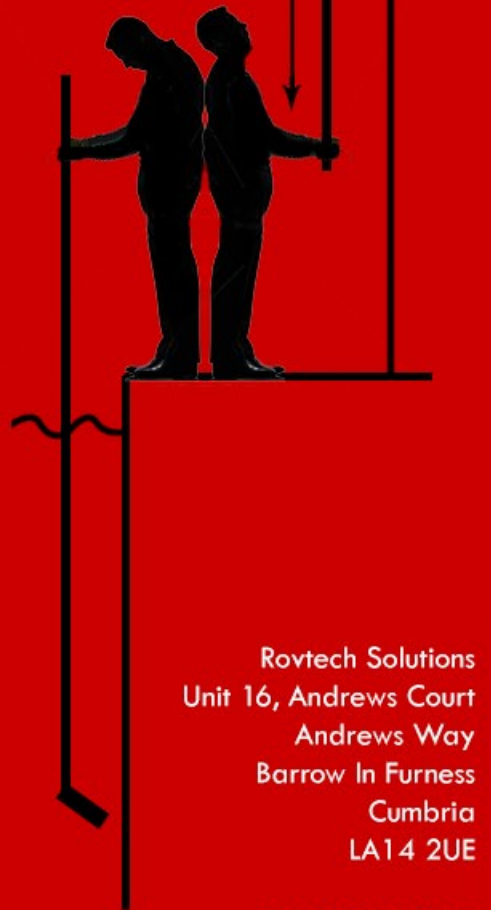

Instant video on a 7" screen.

Record to SD Card for later analysis

Both in air/water compatible

No tools needed - full manual adjustment

2m - 22m
